HYDROSTAR low speed high torque Motors

FEATURES

- Speed infinitely variable and torque constant over the entire speed range.
- Excellent efficiency allows precise positioning of driven equipment.
- Rapid acceleration, deceleration and reversing.
- Large main bearings assure long life and allow heavy side load capacity.
- Eighteen standard models offering up to 20,000 lb. torque.
- Many multiple displacement models.
- SAE ports including 4-bolt flanges and straight threads.
- SAE splines and tapered keyed shafts are standard.
- Several drain port locations to ease mounting.
- Seals made of Viton® available from stock.
- Available from several regional stocking warehouses throughout North America.
- Distribution throughout the world.
- All LSHT motors are 100% factory tested before shipping to insure they meet or exceed all performance specifications.

Hydrostar's radial piston design achieves extremely high torque at speeds as low as 3 rpm. Pressurized oil exerts a force that is transmitted from the piston through the connecting rod to the camshaft. In the valve housing, a distributor valve rotates with the camshaft and directs the oil into the cylinders. For smooth rotation, multiple cylinders are under simultaneous pressure. The multi displacement motor shown above, uses a shifting piston inside the cam to change displacement.

SPECIFICATIONS (Single Displacement)

Model	Displacement (in ³ /rev)	Output Torque at 1000 psi (ft. lbs.)	Max. Cont. Output Torque (ft. lbs.)	Max. Cont. Pressure (psi)	Inter. Peak Pressure (psi)	Speed Range (rpm)	Max. Cont. Power (hp)	Weight (lbs.)

TYPICAL BASIC CIRCUITS

Open Circuit

Fixed displacement pump with control valve, anti-cavitation check valve and relief valve. Direction is controlled with 3 position 4-way valve giving forward, reverse, and stop.

Open Circuit (with Free Wheeling Valve)

Fixed displacement pump with control valve, anti-cavitation check valve and free wheeling valve. Direction is controlled with 3 position 4-way valve giving forward, reverse, and stop.

Closed Circuit

Variable displacement pump with charge pump, relief valve, shuttle valve system. Output speed is variable either forward or reverse in response to the volume of flow and its direction, as controlled by the operator with the pump displacement controller.

Note: Flange Adapters to SAE J518c PORT are available. *Straight w/key shaft also available.

Pilot Arrangement For Multiple Displacement Motor

FLANGE ADAPTER

MODEL	PART NO.	WGT. (lbs.)
MR-525	37530	20

Note: Dimensions for reference only. Please refer to individual Bulletins for detailed dimensions.

HOW TO ORDER

Example: MRH2-190-1-EW-R

DESIGN

Heavy Duty: MRH
Standard: MR
Double flow: MRHD

TYPE

Single speed: None
Multiple Speed (2 Speed): 2

SIZE

(Nominal displacement in cu. in/rev.)
12 - 540

MULTIPLE DISPLACEMENT CODE

* Omit for single displacement motor
** Design number

OPTIONAL SPECIFICATIONS

Extended Speed Indicator Shaft
Seals made of Viton®
Air Bleed in Front Cover

TYPE OF OIL PORT

4 Bolt Flange (SAE-J518c)
6 Bolt Special Flange

TYPE OF SHAFT

Straight with Key
Involute Spline (SAE-J498b)
Interchangeable Spline (SAE-J498b)
Tapered with Key

Customer Applications

- Fishing Boat Equipment
- Drilling Machines
- Plastic Injection Machinery
- Forest Equipment
- Mining Equipment
- Shredding Equipment
- Railway Equipment
- Sawmill Plants
- Amusement Rides and Simulators
- Conveyor Industry
- Industrial Equipment
