REVERSIBLE AUTOPACKS

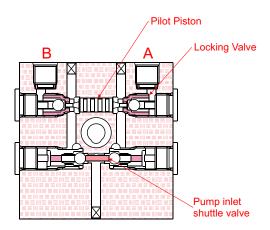

200W AC Motor

Versatile range of micro power units for mobile and small industrial applications.

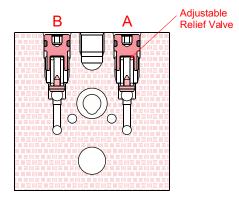

Flows to 2,2l/min; Pressures to 180bar Motors 150W, 200W, 500W & 800W dc or 200W ac

Section through **Autopack** showing (top) Integral Pilot Checks and (below) the suction valve shuttle which allows oil to circulate through the pump.

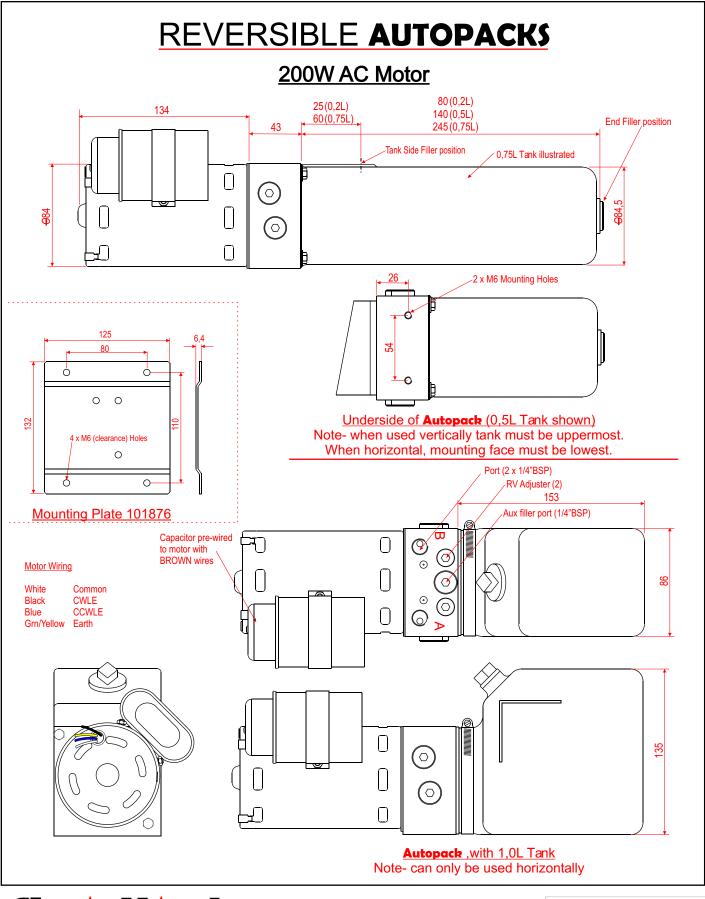

Secondary section through **Autopack** showing Integral Relief Valves allowing individual pressure setting for each port.

Global support & servicing

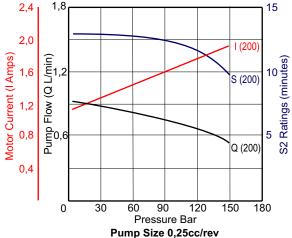

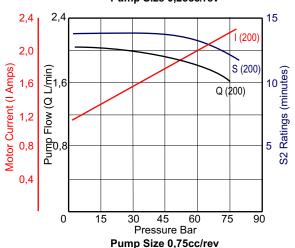

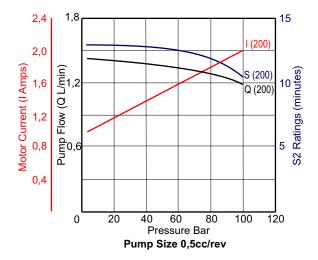

PERFORMANCE DATA REVERSIBLE **AUTOPACKS**200W AC Motor

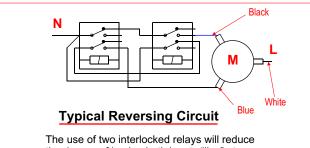

Nominal performance of pack combinations at constant voltage and at nominal 20°-25° C with ISO VG22 oil.

The use of two interlocked relays will reduce the danger of having both inputs "live" at the same time. Motor EARTH wire must be connected. Consult a qualified electrician for component specifications.

Installation, Operation, Commissioning

If mounting vertically, the tank must be uppermost. The 1L tank (code B10) must be horizontal Tanks must normally be vented to atmosphere. The volume is reduced if used unvented due to the need for air space. It can be very difficult to fill the tank through the body tapping due to air locks. Remove the tank for initial filling.

Reversible Operation. The motor may be reversed using the circuit above as a guide. Beware that the un-connected lead will be "live" when the motor is running.

<u>Priming.</u> Reversible packs can appear not to work when first commissioned. Invariably they will need air bleeding from the pump suction valves. Loosen the lower side plugs while the pack is running until all the trapped air has bubbled out. This will not be needed again unless oil is lost from the pack.

AC Motors. Due to the characteristics of AC motors they may not always start under load. The hydraulic system may be modified to overcome this.

The 'RFY' motor is fitted with a self-resetting thermal cut-out to protect the motor if the S2 times are exceeded.

Reversible AUTOPACKS - TECHNICAL DATA

Hydraulic Fluid(recommended)

Mineral hydraulic oil (HM or HV)

For normal ambient temp range (0°C-40°C)

ISO VG22 to ISO VG46

Working temp (ambient) -20°C - +40°C

Weight (app) kg

With 150/200W motor 2,8kg

Maximum Pressure (see performance curves)

All pump sizes 180bar

Options Available

Reversing Start Switch
Remote Start/Stop Switch Pendants
Foot mounting bracket
Circuit variations available eg. for
single acting circuits, auxiliary
connection ports etc. (min quantity
may be required).

MAIN SPARES KITS

Pump Kit KPF0**06A ** = pump code ref Centre Plate Kit KCAA1101B

Seal Kit KSKA01A

Foot Mtg Bracket 101876

Motor Kit KMDRFY01A

Tank Kit KTA***01A ***= tank code ref (eg E05)

Reversible AUTOPACK - ORDERING CODES
